APOLLO  SURGICAL™

Surgery. Simplified.

Nothing like it!

Conceived in a surgeon's mind.

Apollo Surgical Industries, Inc. is a private medical device company that was formed in 1997 by Dr. George Christoudias, a prominent laparoscopic general surgeon and oncologist who has performed over 15,000 operations in his 35 year career. In 1990, he became one of the first surgeons to embrace and regularly practice minimally invasive surgery, giving him an early and insightful perspective on its emerging needs.

As a cost-conscious and meticulous surgeon, Dr. Christoudias quickly recognized that such an innovative form of surgery deserved an equally advanced technology to address its new challenges. He has since obtained over 18 surgical patents, and started Apollo Surgical to offer simple solutions to complex frustrations in the operating room.

Apollo Surgical is now a family company that designs, develops, and distributes an exclusive line of innovative products intended to simplify a variety of surgical needs.

Totally Disposable Gauze Dissectors

Disposable gauze dissector tips fused onto lightweight aluminum shafts that are packaged individually sterile and ready for immediate use.

Indicated for: Spinal surgeries such as ALIF, XLIF, Lateral Procedures, General and bariatric laparoscopic procedures for dissection, retraction, and probing **5mm**
Total Length: 38cm / Working Length: 38cm / Width: 5mm / REF: TDSG5

DURABLE

- » Up to seven layers of 100% surgical cotton gauze allow a higher capacity to absorb fluid when compared to any of its competitors

WASTE LESS, PAY LESS

- » The only dissector with a reusable handle component saves 80% of otherwise wasted trash and money

MIX AND MATCH

- » The same disposable tips thread onto a wide variety of reusable handles including: laparoscopic and conventional types, short and long lengths, and 5mm and 10mm widths

EFFICIENCY THROUGH VERSATILITY

- » Overlap inventory by consolidating to one dissector that can be used for both conventional and laparoscopic procedures

CONTROLLED LEVERAGE

- » All dissector handles are made of either stainless steel (reusable) or anodized aluminum (disposable) for sturdy dissection and retraction without any bending or breaking

USE ONE, PAY FOR ONE

- » Since one dissector lasts for an entire surgery, each is packaged individually sterile and ready for use

PERFECT FOR PORT CLEANING

- » Both the 5mm and 10mm gauze dissectors fit flush inside the port lumen, giving a perfect and clean wipe with every pass

Universal Disposable Tips

Each disposable tip is packaged individually sterile and threads securely onto any corresponding reusable handle.

5MM DISPOSABLE TIP

Aluminum frame wrapped in 5 layers of 100% surgical cotton gauze

Indicated for: Use with any 5mm Reusable Handle for same indications

Total Length: 3.2cm

Working Length: 2.5cm

Width: 5mm

REF: SG5

10MM DISPOSABLE TIP

Aluminum frame wrapped in 5 layers of 100% surgical cotton gauze

Indicated for: Use with any 5mm Reusable Handle for same indications

Total Length: 4cm

Working Length: 3.4cm

Width: 10mm

REF: SG10

Laparoscopic Reusable Handles

Each reusable handle is made with stainless steel that can be steam sterilized for use with corresponding disposable tips.

SHORT LAPAROSCOPIC HANDLES

Indicated for: Port cleaning, or cardiothoracic procedures for dissection, retraction, and probing

5mm (For Use With SG5 Disposable Tips)

Total Length: 32cm / Working Length: 20.5cm / Width: 5mm / REF: SGH532

10mm (For Use With SG10 Disposable Tips)

Total Length: 32cm / Working Length: 20.5cm / Width: 10mm / REF SGH1032

LONG LAPAROSCOPIC HANDLES

Indicated for: Port cleaning, or cardiothoracic procedures for dissection, retraction, and probing

5mm (For Use With SG5 Disposable Tips)

Total Length: 44.5cm / Working Length: 33cm / Width: 5mm / REF: SGH5

10mm (For Use With SG10 Disposable Tips)

Total Length: 44.5cm / Working Length: 33cm / Width: 10mm / REF SGH10
